NEXT GENERATION LAW ENFORCEMENT

Know² helps bring knowledge to the workplace
Knowledge

Know² is revolutionizing how law enforcement operates by bringing together expert knowledge, standard operating procedures and applications that allow officers to do their job more effectively in the field.

Just as criminals are using the latest technologies to commit crime, the public expects law enforcement to use modern technology in order to best respond to the wide variety of complex crimes with a high level of effectiveness and professionalism.

Modern law enforcement work requires being knowledgeable about many types of crimes, best practice and correct operating procedures. Know² applications and services allow officers to have access to knowledge and guidelines where and when they need it.

Brief background

Know² assists governments, international organizations and law enforcement agencies tackle global security problems.

Transnational organized crime, for example cybercrime, human trafficking, money laundering and crimes against women and children are a major cause for concern for countries around the world. Organized crime groups have become more sophisticated. They are now using more sophisticated methods to commit crime and disrupt national and human security. There is a huge amount of cross border traffic and trade. This allows criminals greater freedom to smuggle arms, drugs, human beings, launder money and commit crime.

Enforcement agencies are faced with the urgent need to increase skill and knowledge of their officers in order to be able to meet these human security challenges. In order to address these specific security context and challenges, governments, international organizations and law enforcement agencies all over the world rely on Know² to design and provide a comprehensive training curriculum, expert consulting and applications for the law enforcement community.
